

CARVEL-CGSA

CARVEL GROUND SLEEVE ANCHOR

Simple, fast and efficient, the Carvelle sleeve anchor system is a proven system that makes it easy to install and tightly secure 60 mm (dia. 2.375") round signposts, bollards, delineators, and other street furniture.

Fully buried 13 mm (.5") deep under the ground, the Carvelle sleeve is not an obstacle and is therefore never damaged in the event of an impact with the fixed equipment, in addition to facilitating road maintenance operations once the equipment is removed. Thanks to the notch specially designed to accommodate the matching nail, the material can only be released using the adapted extractor. Simply effective, the carvel sleeve anchoring system is as safe as it is affordable.

STABLE, STURDY
AND DURABLE
